-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, 15, 16, and 18-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Sasahara et al (JP 7-295221 in view of its English Language abstract and based upon a spot translation by a PTO staff member).

Sasahara et al disclose a positive working resist composition comprising a monomer meeting the limitations of the instant condition a1 (see B-22- B-24 or M22-M24) as well as claims 2, 3, and 16. With respect to the instant claim 18, monomer B-22 (M-22) contains a Cl atom in the instant position R<sup>24</sup> which meets the structural limitations of the instant claim 18. The composition is employed in a method wherein the composition is coated onto a substrate, dried, exposed, then developed. The reference teaches that the exposure may be carried out by ebeam. Thus, the instant claims 1-3, 15, 16, and 18-20 are anticipated by the Sasahara et al reference.

### *Allowable Subject Matter*

3. Claims 4-14 and 17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art of record fails to teach or suggest to one of ordinary skill in the art to prepare a positive radiation sensitive composition comprising a compound meeting the conditions a2 or a3.
